Creative Images™ Color Slide
Jewelry Mirror

Make an inspired jewelry station to keep all your baubles close at hand. From earrings to necklaces, this custom mirror panel will keep your favorite jewelry organized. Custom quotes will inspire you to keep smiling every day.

Materials:
- Creative Images Color Slide #8303
- Copper Mesh #85086
- Copper Adhesive Sheet #5569
- 1 Medium Double Strength Mirror #M3900
- 1 Medium Almond Opal Glass X21072 (or select any light color)
- Delphi Studio™ Scroll Hooks #94236
- 8 pieces ¾” Square Bevels #5260
- 1 piece 1” Square Bevel #5261
- 1 Clear Glass Rod #591004 (or select any color)
- 2 feet Brass Jack Chain #5474 (or select any color)
- 1 piece 6’ Adjustable U Zinc, Brass or Copper Came (or mix and match metals)
- Mastercraft Leadfree Solder #2999
- 7/32” Copper Foil of your choice (copper, silver or black backed)
- Optional: Self Adhesive Rubber Feet #69501
Instructions:

1. Print and assemble the pattern – this project is sized 11” x 17” (2 pages 8-1/2” x 11”).
2. Cut opaque glass and mirror to fit the pattern. Clean and dry your glass.
3. Print the quotes design page on Creative Images™ Color Slide using a color copier or color laser printer following package directions. You can design your own custom quotes or artwork if preferred. Note: Creative Images™ Color Slide does not work on ink jet, laser jet or bubble jet type printers.
4. Cut apart your designs to fit onto glass.
5. Soak color slide in warm water, then slide onto glass to transfer. Position on glass at least 3/16” away from edge of glass. Smooth out any air bubbles and wrinkles, then blot away excess water with a soft cloth or paper towel.
6. Allow to dry completely and bake in a pre-heated oven at 365 – 376 degrees F following package instructions to set the designs. Note: over-heating will cause the color slide to discolor.
7. Cut sections of copper foil sheet to fit bevels and apply to flat side of bevel squares. Delphi Tip: It is easiest to cut foil sheet larger than bevels, peel away backing and apply to bevels. Burnish to smooth foil in place, then use a craft knife to trim away excess.
8. Cut glass rod to fit pattern. Note: Mosaic nippers are an excellent tool to cut glass rods quickly and easily.
9. Unfold copper mesh to reveal a single layer. Use shears to trim to fit the pattern.
10. Foil and burnish all glass pieces and position on pattern.
11. Use masking tape to mask off color slide designs.
12. Use masking tape to mask copper mesh, leaving approximately 3/16” border exposed all the way around. Mask from both front and back of copper mesh. Set aside.
13. Flux and solder all glass pieces in place. Flip panel over and repeat, soldering on reverse side.
14. Flux border of copper mesh and tin. Flip over, flux and tin reverse side.
15. Position copper mesh on front of panel and tack solder in position.
16. Flip panel over and solder copper mesh in place from reverse.
17. Flip panel over to reveal face again, apply finish solder bead or decorative soldering to entire project as desired.
18. Cut adjustable U came to length to fit panel. This can be done using 90 degree or 45 degree mitered corners.
19. Slide came onto edges of glass and secure with masking tape. Apply flux and solder corners from front and back of panel.
20. Join each solder line to the adjustable U came border with solder on the front and back of the panel.
21. Add Scroll Hooks approximately ¼” to ½” from the top edge of the panel on the outside edges of the came border following package directions.
22. Clean your panel with flux remover and rinse thoroughly.
23. Attach jack chain to hang your panel.
24. Optional – apply self adhesive rubber bumper feet to reverse of panel at corners to position panel away from wall.

Beauty is being the best possible version of yourself on the inside and out

Happy Girls are the prettiest

“Beauty is about enhancing what you have. Let yourself shine through”
~ Janelle Monae

“Beauty begins the moment you decide to be yourself.”
~ Coco Chanel

Beauty is what you feel about yourself, not about what you see in the mirror

Let your smile change the world. Don’t let the world change your smile.
The prettiest thing you can wear is a smile.

“Beauty is how you feel inside, and it reflects in your eyes. It is not something physical.”
~ Sophia Loren
