

# Creepy Spider

90 COE

Spiders don't have to be scary – silly spider 3D sculptures are the perfect accent for your Halloween décor.

Original design by Artist Julie Haan.

## Materials:

#85817 Green Millefiori

#B010076 Black Opal Rods

#B010083 Black Opal Coarse Frit 5 oz.

#B010082 Black Opal Medium Frit 5 oz.

#24660 Delphi Studio Dome Paper Weight Mold

#24652 Delphi Studio 5" Square Slumper Mold

## Instructions:

1. Fill the prepared Dome Paper Weight mold about ½ full with Black Opal frit (both Medium and Coarse).
2. Fire to a full fuse.
3. Cut Black glass rods (4 pieces 5" and 4 pieces 4-1/2")
4. On a prepared kiln shelf, lay out glass rods in two fans, joined at the center to form legs. The long rods should be positioned in the corners, short rods in the center.
5. Center cast spider body over legs.

6. Place several millefiori slices on the shelf to fire (they should not be touching any other glass).
7. Fire to a medium fuse.
8. Apply shelf wash to the Square Slumper mold, covering the top surface and outside edges.
9. Center the fused spider on the prepared Square Slumper mold with long legs at the corners. Place on a prepared kiln shelf.
10. Fire to slump. Note: Glass rods will usually slump at approximately 1150° F, it is recommended to check progress periodically for best results.
11. Glue fired millefiori eyes on to the spider to complete.
