

Here Kitty, Kitty!

PROJECT TITLE:

Here Kitty, Kitty!

DESIGNED BY:

Jeanne Baruth

SKILL LEVEL: *(Adult 1-5: 1 being the easiest, 5 being most difficult)*

1

TIME TO COMPLETE:

1 hour - Does not include drying time.

PROJECT TIP:

Betta fish are beautiful, with their vibrant colors and long, flowing tails. The betta are relatively hardy, but need care. Before investing in a betta fish find out more at www.bettafish.com.

Sea Monkeys would also be a good choice for type of habitat.

Moreover, for those less brave of becoming a pet owner, Artificial Plastic Floating Fish Ornament for Aquariums are available online.

INSTRUCTIONS:

1. Set your printer following the instructions on the KraftyBlok™ Image Art package. Copy and save the kitty image to your computer. Print image using your available image software. Allow paper to set 10 to 15 minutes to dry. Trim to size with scissors.
2. Place transfer in a bowl of water and wait approximately 1 minute.
3. Place the KraftyBlok™ on a flat work surface with the opening facing away from you. Slightly moisten the face of the block with a wet paper towel.
4. Position the transfer above the surface at the top of the block. Roll a ½" of the backing paper away from the top of the Image Art transfer (the decal). Place the transfer on the surface of the block so it is parallel with the top edge. Take extra care when sliding the decal as they are delicate and can tear easily. Gently slide the Image Art full transfer from the backing paper onto the surface. Use a finger to smooth the transfer as you peel away from the backing paper.
5. Gently pat and smooth the Image Art transfer with a moist paper towel eliminating air pockets and wrinkles.
6. Allow to dry overnight.

7. Use a clear sealer specifically formulated for sealing decals to glass. Mask off area around the transfer to prevent overspray from getting on the rest of your project.
8. Spray the sealer according to the manufacturer's directions and allow it to dry.
9. OPTIONAL: To add a bit of whimsy, create feet by applying four glass cubes, ceramic tile or flat beads to the bottom of the KraftyBlok™. Glue in place using E6000 and allow them to dry according to the manufacturer's recommendation.
10. Remove the stopper and rinse the interior of the KraftyBlok™, the glass gems and the plastic plant with spring or distilled water before assembling the aquarium.
11. Fill the block with approximately one inch of gems. Insert the plastic plant off to one side. Follow your pet shop specialist's information in preparing the KraftyBlok™ for your selected species.

MATERIALS CHECKLIST:

Laser Color Printer
KraftyBlok™ Mini
KraftyBlok™ Image Art Paper
Kitty Image
Glass Gems ½"
Small Aquarium Plant
