

# Simple Handmade Ornaments

Create personalized ornaments to accent your holiday décor.

Ornaments are fast and easy to make when you decorate round bevels with pre-drilled holes. You can also create ornaments using your favorite glass.

To cut perfect ornaments, use a circle cutter such as Easy-Cut Lens Cutter # 7991. Eliminate sharp edges by grinding with a specialty bit such as the Mika 3/4" Mirror Bevel #7305. Finish by drilling a hole with a diamond drill bit.

**Delphi Tip:** Be sure to water cool glass while drilling to prevent chips and cracks, and to prolong the life of your drill bit.

Add your own personal touch:

- Use oven-bake glass paints such as # 64227 or # 64217 to create polka dots, holiday motifs, and monograms.
- Creative Images™ Color Slide # 8303 makes it easy to add color images with detail. Scan and print holiday greeting cards and vintage family photographs for special keepsake ornaments.
