Bullseye Fracture-Streamers, Streamers, Chopstix and Mardi Gras

Fracture-Streamers (FS): paper-thin shards and curving glass threads on clear or white background.

Streamers: consist of thin curving glass threads on a clear background.

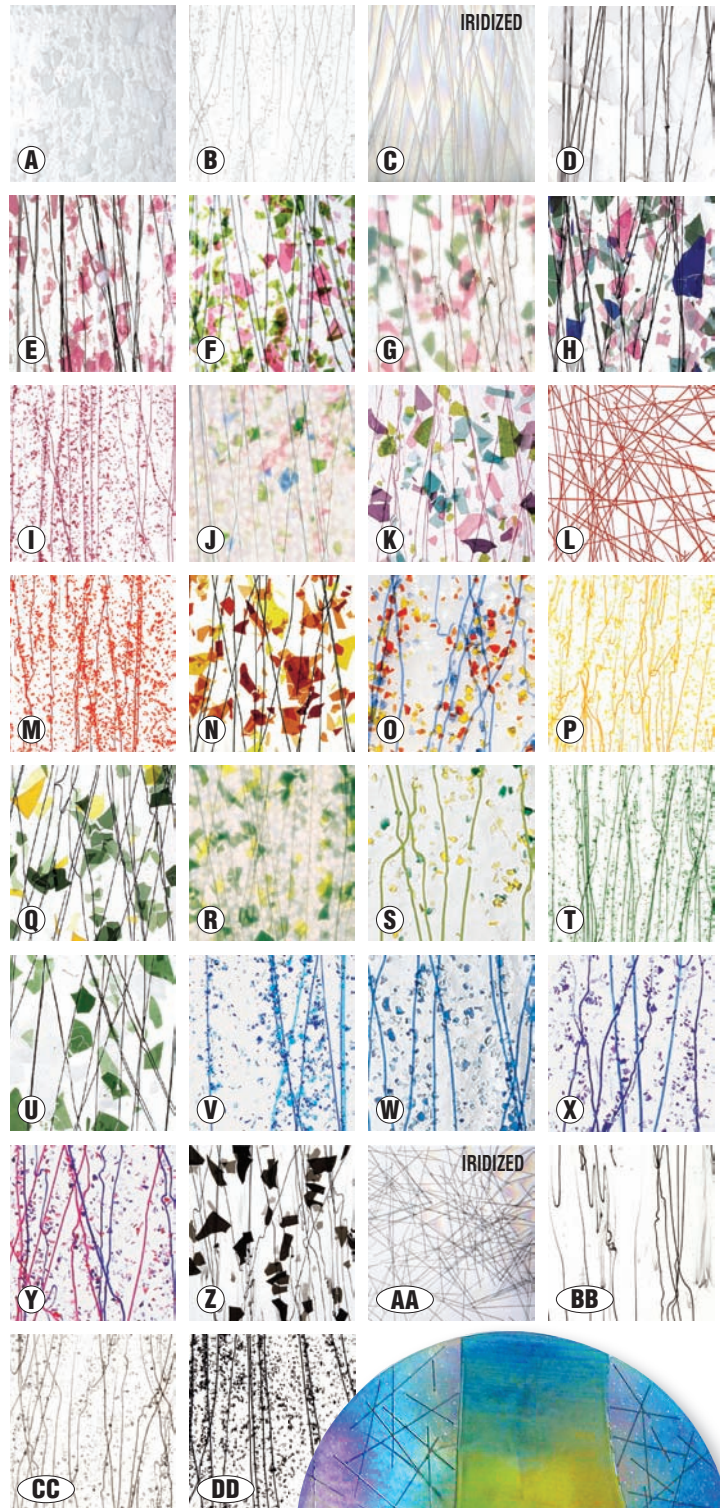

Chopstix: is made of random pieces of straight stringers that are scattered over a clear background creating a bold, graphical glass.

Mardi Gras (MG): is festive glass that combines frit (rock-salt sized glass granules) and streamers (threads of glass) on a clear background. Glass is 3mm thick on clear. 90 COE.

CBS Dichroic Extract Sample Sets

Dichroic Extract is the pure form of CBS's high quality dichroic coatings, extracted off glass and preserved in a glass container. Because it is pure dichroic coating, there is no COE and it can be used in flameworking, glass blowing, fusing and more. Extracts listed below are sold in 1/8 sheet equivalencies (approx. 4" x 8").

Plate Molds

Reusable ceramic molds can be fired many times, making them an excellent value. Must be kiln washed before use. Due to manufacturing process, sizes may vary slightly. All molds are conveniently pre-drilled, unless it is not necessary for the mold size and shape.

ZYP Boron Nitride Mold Release

Versatile release can be used on stainless steel or ceramic slumping and casting molds. Aerosol formula provides uniform coating to produce a flawlessly smooth project. Pump spray version can be air shipped. Both release glass easily and are effective at temperatures up to 1800°F.

Delphi Tip: Because Boron Nitride seals the surface, once you use it on your mold traditional primers won't absorb evenly.

Get a Finished Edge Fast

Bottle Bit

Removing sharp edges off bottles just got easier. Simply attach the Bottle Bit to any standard drill and smooth your rough edge. The cup of the bit securely holds bottles in place, so the rotation of the drill does all of the work. Use with wet/dry sandpaper or diamond hand pads, not included.

Delphi Tip: The Bottle Bit securely holds wine bottles up to 3-1/2", for smaller bottles simply place more of the padding around the bottle to get a snug fit.

The bearings allow the cutter head to move smoothly, producing a clean score – even on small circles!

Discover the Difference a Superior Cutter Makes

Silberschnitt® Pro Circle Cutter with Ball-Bearing Head

Ball-bearing mount swivels to perfectly match the arc of the circle, producing a clean and consistent score. Carbide cutting wheel offers exceptional durability without dulling, so you can keep cutting with confidence. Cuts circles from 2-1/2" to 24".

Delphi Recommends: "The ball bearings allow the cutting head to rotate and match the degree of the arc. This is especially important on smaller circles. The score is better because the head swivels on the ball bearings, making this an excellent cutter." — Roy Kapp, Delphi Glass Expert

Delphi Tip: Panel Reinforcement

To properly reinforce a panel, the reinforcement strip needs to be one continuous piece, being secured into the channel of the came on one side of the panel, worked in between the foiled glass pieces across the panel horizontally and then secured into the came on the other side.
