Fused Spider Web Lantern

90 COE

Cast a delightfully ghoulish glow on Halloween with this lantern featuring cobwebs and spindly spiders.

Original design by Artist Julie Haan.

Materials:

#40215 Wrought Iron Lantern

#B8234 Bullseye GlasTac Glue

#B010072 2mm Black Opal Stringers

#24686 Pre-cut Black Ovals 8 Pack

#U606080 Orange Opal on Clear Streaky Glass – 4 Small

#153205 Cyan/Copper on Thin Black Dichroic Glass – 1 piece 4" x 4"

Instructions:

1. Cut 4 pieces of orange glass to fit openings for lantern (3 pieces approximately 7" x 9-1/4", 1 piece approximately 6-3/4" x 9").
2. Print and enlarge pattern (below) to fit panels. Position a copy of pattern under orange base glass. Note: As stringers are cut and positioned, leave a 1/4" border of base glass so panels will fit the lantern frame.
Cut black stringers to form "spokes" of web. Position stringers on base glass and secure with a small dot of GlasTac glue.

4. Cut Black Stringers to form "rings" of web. Position on base glass and secure with GlasTac.
5. Cut a Pre-cut Black Oval in half to form the spider body. Reserve un-used half for next panel. Place on base glass, secure with GlasTac.
6. Add small pieces of Cyan/Copper Dichroic to form eyes of spider.
7. Cut lengths of Black stringer to form 8 spider legs and thread connecting spider to web. Position according to pattern and secure with GlasTac.
8. Fire to a medium fuse.
9. Repeat steps 2-8 for each panel, completing 4 panels.
10. Position panels in lantern and secure.
