

Fused Garden Stakes

Personalize your garden with custom garden stakes. Created using summer pre-cuts, these are a fast and fun way to add personality to your garden.

Materials:

Fusible Glass

1 Medium to use as your base glass

Your choice of summer fusible pre-cuts

#30389 Garden Varieties Decals

#30386 15" Metal Plate Stake (one for each)

#7405 Shelf Paper

#77201 Triolyse or other adhesive

1. Cut base glass for each pre-cut, projects shown only used one layer.
2. Cut out desired decals and soak in water. Once decals separate from paper, slide onto glass and into position. Pat with dry paper towel to remove excess water and air bubbles. Allow to dry.
3. Place base glass on kiln shelf lined with shelf paper and arrange pre-cuts on tops and fuse. Note: Project shown was made using 96 COE glass fired to 1275° F. See glass manufacturer's recommended firing schedules.
4. Adhere metal plate stake to the back of your finished piece with triolyse or other adhesive according to manufacturer recommendations. Allow to cure.
5. Place in garden and enjoy!

Additional project ideas: Use other pre-cuts to add a touch of whimsy to your garden and try out our Herbs Hi-Fire Decals (item #30388) for even more garden stake ideas!
