

Candy Cane Stained Glass Picture Frame

Display your favorite holiday photos in this stylish frame inspired by our favorite holiday candy

Project shown by artist Kayleigh McGrath

Materials:

Fusers Reserve Candy Cane Opal Art – Medium (#XFRCROA)

OR

Spectrum Godiva Opal Art Striker – Medium (#X6755)

Clear Single Strength Glass (#M3905)

7/32" Copper Lined Foil (#425681 or #5561)

60/40 Solder (#3000 or #5471)

1/8" Flat U Zinc Came (#5600)

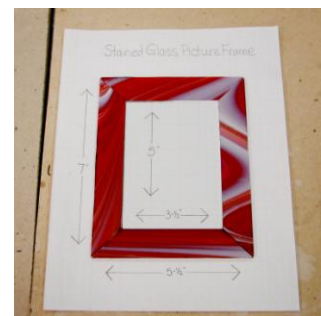

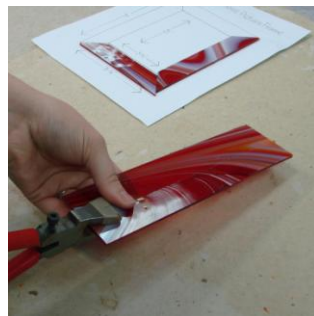

Picture Frame Easel Back (#1710)

Basic glass cutting, soldering tools and stained glass supplies

Instructions:

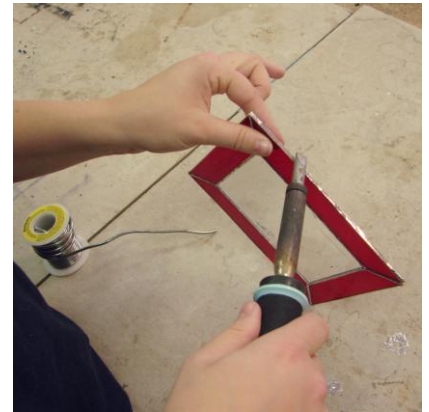

1. Using the Pattern below cut pieces of Candy Cane and Clear Glass following pattern measurements.
2. Wash and dry each piece, then arrange pieces on pattern for easy reference.
3. Foil and burnish each piece.
4. Using layout blocks and homosote board, position all pieces snugly together. Apply flux and begin soldering your seams.

5. After you have completed one side hold your piece on the edges near the center and carefully turn your project over. Solder pieces on the back of the piece.
6. Finish by tinning the edges of your project. *Delphi tip: Using a panel vice (#92001) to hold your panel will free up your hands and make this step easier!*
7. Measure the 1/8" U Channel Came and mark at 4-1/2", then 6" from your first mark and again at 4-1/2" out from your previous mark.
8. Using a 90 Degree Notcher (#7369) notch came to fit your picture frame. Use the final notch and gently wiggle it back and forth to remove the extra Flat U Channel.
9. Tack solder came to the back of your frame at each corner.
10. Use flux remover to wipe excess flux from your frame, wipe clean and polish.
11. Slide photo and easel back into the channel on the back of your frame and enjoy this year's holiday memories in style.
