Licensed Collegiate Pre-Cuts Make Art Projects Quick-and-Easy

Original projects by Val Oswalt

Delphi's exclusive line of licensed collegiate pre-cut glass logos and mascots make it easy to show your school pride! Create finished projects you'll be proud of, even if you're new to glass art. Perfect for the dorm room, den or dining room; you can even create your own jewelry to wear to the big game! Get more ideas from the projects below.

Game Day Fund

Save money for the big game while boasting of team pride with this fast and easy bank. Simply apply a 4" pre-cut glass logo or mascot to the Krafty Blok #426112 with clear silicone adhesive #5690. Let set for 24 hours and start saving!

Fused Glass Ring

The perfect fashion accessory for any fan! Cut an oval of *fusible glass for the base and place a ½” pre-cut glass logo on top and tack fuse. Use a glass adhesive, like Triolyse #77201, to adhere the fused cabochon onto a ring. Project shown made with Silver Plated Oval Cabochon Ring #85437.

Suncatcher

Pre-drilled mascots make decorating the dorm easy. Simply thread Hanging Line #63908 through the holes and secure with Connectors #63909. Hang in a window with suction cups #5226PK, to show your spirit.

Mosaic Box

Our wood boxes with recessed centers are the perfect base for a show stopping mosaic creation. Spotlight your team's logo or mascot by surrounding it with glass tiles. Secure glass with an adhesive, like Weldbond #65103, before grouting. Go Team!

Glass Serving Dish

Get ready for game day and serve appetizers in style. Cut two pieces of *fusible glass in your schools color to fit the shape of your mold. Stack cut glass pieces, center a pre-cut team logo on top and fuse. Place fused glass on pre-washed mold and slump. Project shown created with Mini Plate Mold #40916.

Napkin or Business Card Holder

Put your spirit on display with a business card holder or a napkin holder. Select contrasting glass in your school colors, cut a piece of each (sizes listed below) layer and full fuse together. Slump the fused piece over mold #80656, using 1/32" fiber paper #92809 as a separator to allow glass to release from the mold. Glue pre-cut mascot or logo to the finished piece with clear silicone #5690 and allow to cure for 24 hours.

- For the napkin holder cut *fusible glass 5" wide by 10" long. 4" Pre-Cut Mascots are recommended for completion.
- For the business card holder cut *fusible glass 3-1/2" wide by 7" long. A 3" Pre-Cut Mascot is recommended for completion.

Fused Glass Bottle Stopper

Make the perfect hostess gift, or create two and keep one for yourself! Cut a piece of *fusible glass to fit Flat Top Bottle Stopper #63962, center a 1" pre-cut team logo and tack fuse. After fusing secure with an adhesive, like clear silicone #5690. When not in use, proudly display in an empty bottle or stylish Stainless Steel Bottle Stopper Base #63973.

*To fuse multiple pieces of glass together, it's important to use glass that is compatible. Fusible glass manufacturers test their glass, labeling it with a COE (coefficient of expansion). To avoid stress-cracks and breakage, it is very important to only use glass that has the same COE in a project.
